

Andrew Tobias' MANAGING YOUR MONEY®

Macintosh Version 4.0

What can Managing Your Money do for you?

■ **Gets you going fast** with new visual navigators and HELP behind every window crafted by financial expert, Andrew Tobias himself.

■ **Helps you budget and manages your checkbook.** You can record and print your checks or make all your payments electronically through the CheckFree payment system. You still use your regular checkbook when it's more convenient. It also lets you set up budgets for your personal or business finances. Managing Your Money will even make your cash flow projections, compare your budget to actual spending and balance your checkbook and all your accounts.

■ **Estimates your taxes.** Handles schedules A, B, C, D, E, F, SE, 2106, Form 1040 and the Alternative Minimum Tax. It's an easy way to stay on top of your tax situation throughout the year.

If you plan to prepare your own tax return, you can transfer your data directly to Softview's MacInTax™.

■ **Manages your portfolio.** You can update and track several stock portfolios, analyze your IRA or mutual funds, update your prices, do stock splits and distribute dividends and interest.

■ **Provides you with your own personal balance sheet — Your Net Worth** — by automatically taking what it knows about you from other sections of the program.

■ **Analyzes your insurance needs.** You'll be able to calculate how much life insurance you need, find out what it should cost you, and organize all your

insurance policies — health, life, auto and homeowners — in one place.

■ **Makes financial calculations easy.** You can figure the internal rate of return on a limited partnership or the payments on a 30-year, 12 3/4% mortgage. Other powerful features include:

- college planning
- retirement planning
- compound interest calculations
- investment analyses
- present & future values
- loan & annuity calculations
- prints loan amortization schedules

■ **And there's more!** Managing Your Money contains a **Reminder Tool** that tracks your appointments and projects and a **MERCHANT & PAYEE LIST** that stores information on you, and anyone you pay frequently.

■ You'll also find extensive business features. And you can export Managing Your Money data to most spreadsheets.
Powerful business features:

- Accounts payable & accounts receivable, with aging
- Forecast cashflow
- Profit & Loss statements
- Balance sheets
- Electronic Merchant & Payee database
- To-Do lists/Appointment calendar
- Expense accounts
- Depreciation
- Actual double-entry accounting when you need it

FINANCIAL POWER MADE SIMPLE!

**Gets you organized.
Puts you in control.
Saves you time.
Andrew Tobias
makes it easy!**

Managing Your Money Gets Raves!

"Managing Your Money is the Mercedes of personal finance programs." MacWeek

"One of the best all-around programs ever written." Daily News, "Money Talks"

"Impressive." Larry Magid, LA Times, Dec. 1990

Managing Your Money Wins!

★★★★½ *Four and one-half stars*
from MacWorld 1990

Best of all, **Managing Your Money's** powerful tools are fully integrated. So you read only one manual, learn only one program, and enter information only once. If you write a check to the doctor in the budget and checkbook section of Managing Your Money, your checkbook balance knows, your cash flow projection knows. Schedule A of your taxes knows and so does your net worth — all automatically.

It's true **Managing Your Money** is one of the best electronic checkbooks available, but it also includes all the financial tools you're ever likely to need in one comprehensive package. And it will keep pace with your growing financial needs.

Why not join the over 500,000 customers who now rely on Managing Your Money to help them make the hard financial decisions with confidence?

The Highlights!

- FREE CheckFree® electronic billpaying option — A \$50 Value built-in!
- Extensive small business features.
- Value. Multiple tools in one integrated product.
- Well-established. Over 500,000 customers trust it.
- Not copy protected.

Suggested Retail Price: \$219.95

System Requirements: Any Macintosh computer with 1MB of memory, a hard disk, System 6.0.2 or later, Finder 6.1 or later. Fully supports color monitors. CheckFree option requires Apple or Hayes-compatible modem.
